Jan Olaszek

Samizdat in the communist countries of Central and Eastern Europe during the Cold War

The term *samizdat* was probably first used by the poet Nikolay Glazkov, who in the 1940s typed his poems in several copies, putting the word on the title page where the name of the publishing house is usually placed¹. It was later adopted to identify texts distributed outside censorship in the Soviet bloc countries during the Cold War. The word *samizdat* comes from the abbreviations of *sam* (own, self) and *izdatelstvo* (publishing house)². In some cases, it is only used to refer to texts that have been typed by successive readers in several copies, thus forming a network for the distribution of publications. Such an understanding dominates in Poland, where texts distributed outside the censorship in the People's Republic of Poland are more often described as independent publications, second circulation or publishing underground. The reason for this is to emphasize the technical advancement (using mainly duplicators, which were rarely used in other countries of the bloc) and the scale of the phenomenon³. However, samizdat is frequently used to describe all texts produced without censorship, regardless of the technique of their creation and distribution, and thus also those printed on duplicators or copied on photocopiers. This understanding of the term has been accepted in the West and in most countries of Central and Eastern Europe.

Undoubtedly, one of the main reasons for the birth and development of samizdat was the lack of freedom of speech in the USSR and its dependent countries. In each of them, the authorities censored the content appearing in the public sphere, striving to eliminate those that

³ On the differences in the use of concepts in relation to the independent circulation of books and journals in individual countries, see: Siobhan Doucette, *A Second Circulation not Samizdat. Polish Independent Publishing, 1976-1989* (Paper Presented at the AATSEEL Annual Conference held in January 2015 in Vancouver, Canada); W. Parfianowicz-Vertun, *Europa Środkowa w tekstach i działańach. Polskie i czeskie dyskusje*, Warszawa 2016, pp. 71-73; J. Olaszek, *Underground Publishing, Samizdat and Central Europe*, „Kwartalnik Historyczny”, vol. CXXVI, 2019, no. 3, p. 130.

did not correspond with the Communist ideology or their politics. Censorship in Bolshevik Russia emerged immediately after the October Revolution and became a permanent element of the political system of the USSR⁴. After World War II, it was introduced in those countries of Central and Eastern Europe where the communists came to power. In some states, in the early post-war years, anti-communist underground organizations published their underground papers. The history of these titles ended with the USSR's collapse.

It is worth dedicating more space to the phenomenon of samizdat in the USSR itself, as it was, in a way, a model for other bloc countries. Its history also shows features of samizdat from other countries. The exact number of journals and books, brochures, loose typescripts of texts distributed outside censorship in the Soviet Union is unknown. Considering the discrepancies in data, it is difficult to make estimates more accurate than those of at least several hundred magazine titles (many of them were of an ephemeral nature, which is typical of samizdat in all Soviet republics and communist countries) and at least several hundred combined publications. The Russians boast the largest "share" in this number. In the Russian SSR, samizdat has been developing since the second half of the 1950s. Initially, it distributed literary texts (short stories, novels, poems, essays), which were rejected by censorship. With time, more and more works were written especially for unofficial circulation. An important step in the development of samizdat was the emergence of samizdat magazines. One of the first was *Sintaksis* poetry almanac, founded in 1959 by journalist Alexandre Ginzburg. Years later, Irina Ginzburg, the wife of the editor, recalled the birth of this project: "On the wave of general interest in the poetry of the late fifties and early sixties, Alik Ginzburg, a twenty-year-old journalism student at Moscow University, came to a completely natural conclusion: circulated and scattered machine copies, passing from hand to hand, read in larger and smaller literary circles, and then typed again [...] had to be collected and published as an anthology. Friends looked at me as if I was crazy", he later said. The idea was ingeniously simple and just as dangerous [...]. Three issues of the magazine were published, the fourth was being prepared, but there was no time. Among the names of young and little-known authors were those that were already recognized by a wider audience - Bulat Okudzhava, Boris Slutsky, Bella Akhmadulina, Nikolay Glazkov, Josif Brodskij, Genrik Sapir. In each issue, Alexandre Ginzburg stated his full name and address - an unusual act at that time. On his part, this was no heroism, he simply treated freedom of actions as the norm. "It is probably natural for you to sign your

⁴ D. Beyrau, *Arcane and Public Spheres in the Soviet Union*, [in:] *Underground Publishing and the Public Sphere. Transnational Perspectives*, ed. J. C. Behrends, T. Lindenberger, Wien-Münster 2014, p. 103.

own work. And what do we care if the authorities think otherwise?"⁵. The last sentences of this memoir point to an important issue of the transparency of the actions⁶. Unlike in the conspiracy press known from other eras, authors and editors of samizdat quite often signed their own names, which, although exposing them to repression, was also important for building credibility. Some of the creators of samizdat in other countries approached the matter differently and hid their personal data, this depended on the strategy of operations, the current policy of the authorities and the specific goal that was the publication's main aim.

In the initial period of the development of samizdat in the USSR, mainly literary works were distributed. Ann Komaromi, an expert in Russian literary samizdat in the book *Uncensored. Samizdat Novels and the Quest for Autonomy in Soviet Dissidence*, pointed out that although it did not have such "revolutionary" potential as the most famous illegal political publications, it was very important for the creation of an independent or dissident identity of its creators. The result was, in her opinion, the emergence of a new kind of relationship between authors and readers, in which the boundaries between the two groups were blurred⁷. Michael Meerson-Aksenov, co-author of the classical anthology of Russian samizdat, wrote: „As writers, authors of literary samizdat were far from political problems. Each was occupied with his professional metter – the creation of an artistically convincing and truthful image of this world, the world which he was formed, lived. which came to feel deeply; finally, a world which came to speak in the author's words, be it the world of concentration camps, the fateful chamber in the [Alexander] Solzhenitsyn's Soviet clinic, the world of the Soviet province, the communal apartment of Abram Terts, the world of the Russian intellectual on the brink of revolution and civil war, the first year of Soviet reality portrayed by [Boris] Pasternak, the world of the poisoned poet portrayed by Nadezhda Mandel'shtam, the world of the absurd, upside-down values and hierarchies of the post-revolutionary years portrayed by Andrei Platonov or the world depicted by Mikhail Bulgakov which took on a truly devilish or mardi gras aspect. But

it was exactly this >>a-political<< literature which gave birth to >>dissonant thought<<⁸. These words can also be applied to samizdat published in other Soviet republics and Eastern Bloc countries.

Literary samizdat in Russia had a significant impact on the development of more political samizdat. In the subsequent phases of its development, appeals, letters, declarations with a political context and later texts containing political programs began to appear alongside poems, stories and novels⁹. The emergence of new "genres" did not cause the disappearance of pre-existing ones, but in a way expanded the overall offer. The emergence of texts illegally distributed in the USSR informing about political events resulted in increased repression of Russian dissidents. In February 1966, two Moscow writers Andrei Sinyavskiy and Yuliy Daniel were sentenced for the content of their works published in the West. They both received high sentences, several years of strict gulag. The convicts were supported by Ginzburg, among others, who distributed materials about the trial in the *White Book*, a collection in the form of samizdat, for which he was arrested¹⁰.

One of the most important moments in the development of samizdat was the appearance of *Chronicle of Current Events* in April 1968. This magazine was devoted to popularizing current information on the activities of the dissident movement and the repressions applied against it by the communist authorities. Thanks to a wide network of co-workers rewriting successive issues, its circulation reached several hundred copies, which was a high result considering the conditions. With time, the magazine also began to be reprinted in the West. The initiator of the magazine was Natalya Gorbanevskaya. In the following years, mainly due to repressions, the editors publishing the magazine varied. It ran until 1983. The *Chronicle of Current Events* created a certain model of informing about repressions, which was referred to by independent magazines in other communist countries. "In the *Chronicle* there were neither emotional opinions, nor assessments, nor even generalizations, it contained only dry facts. And that is what made each issue an irrefutable proof that the regime itself is against the law and against humanity," remembered the well-known Russian dissident Sergei Kovalev, who co-

wrote the magazine¹¹. This model was adopted by creators of samizdat writings in other Soviet republics and communist countries. In the seventies, more and more independent journals of various character were published: literary, philosophical and religious, social and political. The Soviet samizdat presented various political ideas, from left-wing to conservative ones. It developed most strongly in large cities such as Moscow, Leningrad, and Novosibirsk¹²; it appeared much less frequently in other locations. Samizdat grew also in the 1980s, although between 1980 and 1984 it was halted by a wave of violent repression by the authorities. At that time, many independent magazines and almanacs stopped publishing. A renewed increase in the number of illegal publications took place under Mikhail Gorbachev during the perestroika period, when dissident circles began to take action more openly. At the end of the decade, some works previously distributed in samizdat appeared in official circulation in the USSR. The best symbol of this change may be the fact that in 1988 Alexander Solzhenitsyn received a proposal to publish two of his works in official distribution in the country¹³.

Undoubtedly, it is the Russian SSR that must be considered the homeland of samizdat, but the phenomenon also developed in several other republics. The character of samizdat in these countries was the emphasis on the importance of national traditions, the fight against the russification of the culture and the promotion of national languages. Samizdat played an important role in the ethnic mobilisation of individual nations, especially the opposing parts of their elites.¹⁴.

Lithuanian samizdat was of a significant scale. Uncensored texts circulated in the Lithuanian SSR earlier, but the first illegal journals appeared in the first half of the 1970s. The most important and longest-running independent Lithuanian magazine was *Chronicle of the Catholic Church in Lithuania*. Its creators collaborated with the *Chronicle of Current Events* and wanted to use a similar model of describing reality, focusing on the violation of Catholic

rights in Lithuania¹⁵. The journal *Perspektyvos*, published in 1978-1981, also gained a strong position. In total, about thirty magazines were published¹⁶.

Samizdat also developed in Ukraine and Belarus. In both countries, it was strongly focused on nationality issues, which was even reflected in the name of the phenomenon used: the dissidents there used the term *samvydav* instead of Russian samizdat. In Ukraine, the first texts distributed outside of censorship appeared primarily in large cities such as Kyiv, Donetsk and Dnipropetrovsk. Ukrainian samizdat developed similarly to the Russian one: first there were literary texts; political journalism began to be published over time. This second trend included the magazine *Volia i Bat'kivshchyna*, published since 1965, or the popular *Ukraїns'kyi visnyk*, published since 1970. The wave of repression in the first half of the 1970s interrupted the publication of illegal magazines in Ukraine until perestroika¹⁷. Samizdat also appeared in other republics. Belarusian samizdat magazines have been appearing since the mid-sixties, when *Padshnezhnik* started being published.¹⁸ However, the development of samizdat took place in the next decade. In total, in Belarus there were about 20 titles of magazines published outside of censorship¹⁹.

Samizdat appeared in several republics that were part of the USSR, but it did not develop on a larger scale there. In Estonia, titles published in Russian were the first ones to appear (*Democrat* in 1969). *Easti Ravushulik Haal* was published in Estonian in the early 1970s. In 1978 *Lisandui Motete ja Uudiste Vabale Levikule Eestis* and *Poolpaevaleht* began to be printed

in the Estonian language²⁰. In Latvia, the first texts without censorship were distributed in the second half of the 1970s; independent magazines (e.g., *Auseklis*) did not start to appear until the second half of the next decade.²¹ In Georgia, in the second half of the seventies, two titles began to be published: *Okros Sacmisi* and *Sakartwelos Moambe*²². Moldovan dissidents have been distributing certain texts outside censorship since the end of the 1960s, but have not managed to create a regularly published magazine²³. It was similar in Armenia, where illegal texts started circulating in dissident circles only in the eighties²⁴. It can be added that the dissidents of the Crimean Tatar community deported to Uzbekistan published their own magazine *Informatsionnyi Biulleten' Initsiativnoi Gruppy Krymskikh Tatar Imeni Musy Mamuta*²⁵. The same was true of the Jewish communities living in some republics that were part of the USSR, who also produced publications distributed outside of censorship; there were at least 20 press titles published by them and mainly issued in Riga and Moscow²⁶.

In Czechoslovakia, *samizdat* appeared in the second half of the 1960s, but grew in the beginning of the next decade. For a long time this development was mainly Czech. In 1972, a samizdat publishing house "Edice Petlice" was established under the direction of Ludvík Vaculík and was active for several years. By 1987, more than 400 volumes of novels, poetry, historical, philosophical, political and literary criticism books were published in this series²⁷.

Three years later, Václav Havel's publishing house "Edice Expedice" was established, which by 1989 had published about 230 titles²⁸. Over time, in addition to literary publications, a more political samizdat developed in Czechoslovakia. One of the most important was *Informace o Chartě 77* published in 1978. With the development of the dissident movement, which lasted until the fall of communism in Czechoslovakia, samizdat writings of various character followed. Among the best-known are *Střední Evropa* a cultural magazine focusing on the Central Europe region, *Vokno* and a student magazine *Revue 88*²⁹. Prague and Brno were among the main locations of Czech samizdat. In Slovakia, the first samizdat magazine appeared in the second half of the 1970s, but more titles were published in the next decade. The most important of them were *Kontakt*, *Nabozenská a současnost* and *Bratislavské listy*³⁰. A specific feature of Slovak samizdat was - as in Lithuanian samizdat - a strong emphasis on the religious and functional themes of the Catholic Church, which was subject to repression; this trend was much less represented among Czech dissidents³¹. It is estimated that in total there were about 400 titles of samizdat titles published in Czechoslovakia³².

In Poland, although cases of distribution of texts outside of censorship had taken place earlier - among others, two magazines published by the underground organization "Ruch" and a small number of Wroclaw hippie magazines - 1976 is considered to be the beginning of the independent publishing movement, when two titles related to the Workers' Defence Committee began to be published: *Komunikat* and *Buletyn Informacyjny*. Gradually, more informational, journalistic and literary magazines began to be published. *Robotnik*, published in large volume, had a special position. The first underground publishing house, "Niezależna Oficyna Wydawnicza" (Independent Printing House) was established in 1977. After the creation of "Solidarity", the independent publishing movement took on a huge scale, thanks to the protective umbrella of the huge workers' union. The introduction of martial law pushed the independent publishing movement underground; from that moment on, virtually all underground writers hid their personalities under pseudonyms. Despite repressions, the independent publishing movement continued to develop, which was evidenced by the multitude

of initiatives, the technical quality of publications and the large volumes. In total, 6.5 thousand books and 5.5 thousand journals were published in Poland (of course, many of them were ephemeral)³³.

In Hungary, the first texts distributed using the samizdat method appeared in the early seventies and were mainly of an artistic nature. The actual beginning of the development of samizdat took place in the second half of the decade³⁴. One of the first major events was the distribution of the anthology *Profil* in 1977, containing many texts rejected by other magazines. In the following years, new samizdat initiatives appeared. In 1981 Laszlo Rajk and Gábor Demszky visited Poland, where they learned the techniques of printing and constructing a duplicator called "a frame". This technique was adopted in Hungary, so the samizdat publications there most closely resemble those from Poland.³⁵ In the same year Rajk established a shop in his house, where samizdat was openly and freely distributed. It operated until 1984. In the 1980s, a number of important magazines were published in Hungary, among them: *Beszélő*, *Hírmondó*, *Demokrata* and *Egzayatak Kozzost*³⁶. In total, about 40 samizdat magazines, including those related to underground culture were published in Hungary³⁷.

There are known cases of the distribution of individual texts outside censorship in the GDR in the 1960s, but the proper development of samizdat took place there in the late 1970s. In total, in East Germany, until the collapse of communism, there were about 30 titles of samizdat magazines published; the most important of them were *Umweltblätter* and *Grenzfall*³⁸.

In other communist countries in Central and Eastern Europe, the circulation of texts outside censorship was incidental and on a smaller scale. Despite some attempts, samizdat did not develop in Yugoslavia³⁹. In Bulgaria and Romania, there were rare instances of the distribution of typescripts outside of censorship, but there were very few more lasting initiatives. In Bulgaria, two samizdat magazines appeared as late as 1988⁴⁰. In Romania, the only samizdat periodical was issued by representatives of the Hungarian minority⁴¹.
